

These stories are from pages 7, 8 and 9 of *First News*. Read the stories, and then try the puzzle. To help you, we have underlined the answers to the crossword puzzle clues in the stories – but you will need to match the correct word with each clue!

## WORLD NEWS

### THE GALÁPAGOS ISLANDS

#### Go Diego!

Diego the giant Galápagos tortoise who almost single-handedly saved his species, is retiring to an uninhabited island to live out his final years in peace. After decades of breeding in captivity and fathering hundreds of his once-threatened species, 100-year-old Diego is finally getting some rest. He is being moved from the Galápagos national park's breeding program on Santa Cruz to his original habitat on the remote island of Española. Happy retirement, Diego!

### ARGENTINA

#### Sailing the Atlantic

An Argentinian man has survived a three-month journey across the Atlantic from Portugal to Argentina, so he could see his elderly parents. After Argentina banned flights due to the coronavirus pandemic, Juan Manuel Balletero took to the seas on 24 March, hoping to arrive by 15 May for his father's 90th birthday. Unfortunately, his journey was hit by big storms, so he didn't arrive until 17 June. He will see his parents after quarantining on his boat for 15 days.

### USA

#### Living to 100

Living an illness-free life beyond 100 years of age may be more likely, thanks to a new study by the University of California in the USA. Diluting the blood plasma (the fluid that carries blood cells) of old mice with a special solution has reversed the signs of ageing. Experiments showed that the brain, liver and muscles all improved after the mice were injected with a solution of proteins and salts. It is an exciting development that could mean today's young people stay youthful and healthy for much longer.

#### ACROSS

- 5) See 4 down
- 6) Not lived in (adjective 11)
- 8) Making something thinner or weaker by adding something to it (present participle 8)

#### DOWN

- 1) Isolating to prevent the spread of disease (present participle 12)
- 2) Nutrients that are made up of many amino acids joined together. These are essential for normal cell structure and function (plural noun 8)
- 3) The liquid element of blood that carries cells and proteins throughout the body (noun 6)
- 4) **And 5 across.** A process through which scientists help living things to create offspring in order to help save the species (noun 8, 7)
- 7) Natural home or environment (noun 7)

These stories are from pages 7, 8 and 9 of *First News*. Read the stories, and then try the puzzle. The answers to the clues are all words in the stories. Answer the clue and then underline the word in the story.
