ALLERGY ACTION PLAN RCPCH Regard Clinic Mediatrics and Child Health

This child has the following allergies:

Photo

- · Swollen lips, face or eyes
- · Itchy/tingling mouth
- · Hives or itchy skin rash
- · Abdominal pain or vomiting
- · Sudden change in behaviour

Action to take:

- · Stay with the child, call for help if necessary
- · Locate adrenaline autoinjector(s)
- · Give antihistamine:

(If vomited can repeat dose)

· Phone parent/emergency contact

Watch for signs of ANAPHYLAXIS

(life-threatening allergic reaction)

Anaphylaxis may occur without skin symptoms: ALWAYS consider anaphylaxis in someone with known food allergy who has SUDDEN BREATHING DIFFICULTY

- A AIRWAY
 - · Persistent cough
 - · Hoarse voice
 - · Difficulty swallowing
 - · Swollen tongue
- **B** BREATHING
 - Difficult or noisy breathing
 - · Wheeze or persistent cough
- CONSCIOUSNESS
 - Persistent dizziness
 - · Pale or floppy
 - Suddenly sleepy
 - · Collapse/unconscious

. mg)

IF ANY ONE (OR MORE) OF THESE SIGNS ABOVE ARE PRESENT:

Lie child flat with legs raised (if breathing is difficult, allow child to sit)

- Use Adrenaline autoinjector without delay (eg. EpiPen®) (Dose: ...
- Dial 999 for ambulance and say ANAPHYLAXIS ("ANA-FIL-AX-IS")
 - *** IF IN DOUBT, GIVE ADRENALINE ***

AFTER GIVING ADRENALINE:

- 1. Stay with child until ambulance arrives, do NOT stand child up
- 2. Commence CPR if there are no signs of life
- 3. Phone parent/emergency contact
- 4. If no improvement after 5 minutes, give a further adrenaline dose using a second autoinjectilable device, if available.

You can dial 999 from any phone, even if there is no credit left on a mobile. Medical observation in hospital is recommended after anaphylaxis.

Emergency contact details:

Parental consent: I hereby authorise school staff to administer the medicines listed on this plan, including a 'spare' back-up adrenaline autoinjector (AAI) if available, in accordance with Department of Health Guidance on the use of AAIs in schools.

For more information about managing anaphylaxis in schools and "spare" back-up adrenaline autoinjectors, visit: sparepensinschools.uk

How to give EpiPen®

PULL OFF BLUE SAFETY CAP and grasp EpiPen. Remember: "blue to sky, orange to the thigh"

Hold leg still and PLACE ORANGE END against mid-outer thigh "with or without clothing"

PUSH DOWN HARD until a click is heard or felt and hold in place for 3 seconds. Remove EpiPen.

Additional instructions:

If wheezy, GIVE ADRENALINE FIRST, then asthma reliever (blue puffer) via spacer

This is a medical document that can only be completed by the child's healthcare professional. It must not be altered without their permission
This document provides medical authorisation for schools to administer a 'spare' back-up adrenaline autoinjector if needed, as permitted by
the Human Medicines (Amendment) Regulations 2017. During travel, adrenaline auto-injector devices must be carried in hand-luggage or or
the person, and NOT in the luggage hold. This action plan and authorisation to travel with emergency medications has been prepared by:
